DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. Japan 2000-386032, filed on 12/19/2000.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).
4. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyake et al. (Pub No US 20010004757)

As per claims 1, 9, Miyake discloses a computer which processes an interrupt when an instruction in a program is executed, said computer comprising a data holding part which holds data at a time when said interrupt starts to occur. [0019]

As per claims 2, 10, Miyake discloses wherein said data holding part includes a plurality of registers. [0013], [0169-170]

As per claims 3, 11, Miyake discloses computer further comprising flags each of said flags indicating whether said data is held in said register. [0316], [0252]

As per claims 4, 12, Miyake discloses computer further comprising a data storing part, wherein said data holding part holds said data to be stored in said data storing part at a time when said interrupt occurs while a store instruction is executed, said store instruction requesting that said data is stored in said data storing part. [0019]

As per claims 5, 13, Miyake discloses wherein said data holding part holds an instruction address of an instruction which causes said interrupt. [0014]

As per claims 6, 14, Miyake discloses wherein said data holding part holds data which indicates a factor of said interrupt. [0250-0251]

As per claims 7, 15, Miyake discloses wherein said data holding part holds an effective address of a load instruction or a store instruction when said interrupt occurs while said load instruction or said store instruction is executed. [0014]

As per claims 8, 16, Miyake discloses wherein said data is used for recovery from said interrupt. (fig.13, 450, [0169-170])
